Deployment choices

OFFLINE / LOCAL

A dependable local deployment for organizations that need LAN-first access and direct control of their server.

- Works on local network
- Local database control
- Scheduled local backups
- Cloud-migration-ready data

CLOUD

A centrally managed cloud deployment for branches, remote teams and secure browser access.

- Multi-location access
- Centralized updates
- Managed online backups
- Scales with users and branches

Expected outcomes

- Fewer stock-outs
- Clear location-wise inventory
- Better purchase decisions

Next step

Visit the product page to review the complete workflow, then submit a purchase or renewal request when you are ready.
